Learning fractally

- *Watched/Listened CLOSELY to all recordings about fractally*
  - *Eden on EOS Chief Delegate Meetings 19 & 20*
  - *EOS Community Fireside Chat*
  - *Bywire News Part 1 & 2*
  - *Cryptodunker*
  - *Helios Breakfast and Blockchain*
  - *Many rewinds!* 😄
- *Read about fractally & fractal gov as much as possible*
  - *All fractally & Genesis fractally messages on telegram & website*
  - *All Eden and Eden on EOS messages*
  - *3/5 of whitepaper so far- DEEP reading!*
- *Wrote and talked about fractally constantly!*
  - *Wrote so many exciting ideas about fractally*
  - *Many thousands of words*
  - *Shared some writing in public chats*
  - *Much more coming soon!* 🙂

Proposing Consensus Workflow

- *Participated in the first fractally fractal on 2/27/22*
- *Proposed 'Process of Elimination' fractal Consensus Workflow*
- *Used in our group & highlighted by Dan Larimer & Joshua Seymour*

Designing fff

- *Designed and shared draft images for fff - first fractally fractal*
- *We might not use the name fff, but the images*

  can easily be changed to fit whatever name we choose
- *Feel free to get in touch if you have any requests or suggestions* 🙂

Aaron Cox 03/02/2022

@Dogman I also wanted to leave one last remark on the conversation that was going on regarding Greymass being able to use a system like Fractally. You said it "will work", but after years of operating in this industry the "will" portion of that statement is something we have been conditioned not to depend upon. To date every attempt has failed. There have been so many promised systems that "will work" over the last 6 years (Steem + EOS) we've lost count, and none of them have been capable of creating the opportunities required to scale an organization like ours.

We luckily over the years have slowly recruited the proper mix of passionate and crazy people who are willing to accept the uncertainty we already face as a block producer, but scaling beyond that is going to require things that are more significant in size and proven to work. Our risk tolerance in some regards is max'd out.

I really do hope Fractally gets the recipe for success right - but history shows us it's difficult. That's why we been thinking about the systems Fractally proposed, how it impacts the ecosystem, and are intentionally trying to break them. We know these systems are easily broken. It's easy to be excited about the ideas behind these things and what they could be - but speaking from my experiences, after repeated failures towards that goal it's really best to temper expectations. (edited)

👍 4 🧠 4 🙏 2

> @Aaron Cox @Dogman I also wanted to leave one last remark on the conversation that was going on regarding G...

Dogman 03/08/2022

Thank you very much for explaining your perspective. This all makes sense and I appreciate your thoughtful feedback.

I agree that it's helpful to temper expectations and avoid depending on any single tool that may break, but there is also great value in imagining, helping each other understand the potential, and inspiring each other to actualize the potential.

EOS and fractally have the potential to help fund teams like Greymass far better than in the past. This will take work and many things need to go right in order to succeed, but the potential is super exciting.

I'm stoked to help actualize the potential of fractally to help great teams like Greymass and help fund important public goods like APIs.... (edited)

> @LionFlash sorry guys at work, but thanks

Dogman 03/08/2022

Thanks for joining

💪 1

Thank you everyone for all the great feedback & ideas above during the fireside chat! Your messages helped me learn a lot and inspired me to write many helpful notes. Thank you so much! 🙏 (edited)

> @Johnatboid @Dogman to answer your question about the importance of API nodes. This is the eospowerup....

Dogman 03/08/2022

Thank you very much for explaining and sharing these helpful resources!

Go APIs! 🚀 (edited)

> @Johnatboid @Dogman are you a paid shill? Seems like a one sided conversation with you.

Dogman Today at 4:52 PM

No, I wasn't shilling or paid to say anything during the fireside chat. I was sharing what I deeply believe is super helpful for everyone. I did earn 21 Respect this week for promoting the adoption of fractal governance though 🙂 (edited)

> @Johnatboid @Dogman the problem with Fractally is not a lack of participation or enthusiasm

Dogman Today at 4:59 PM

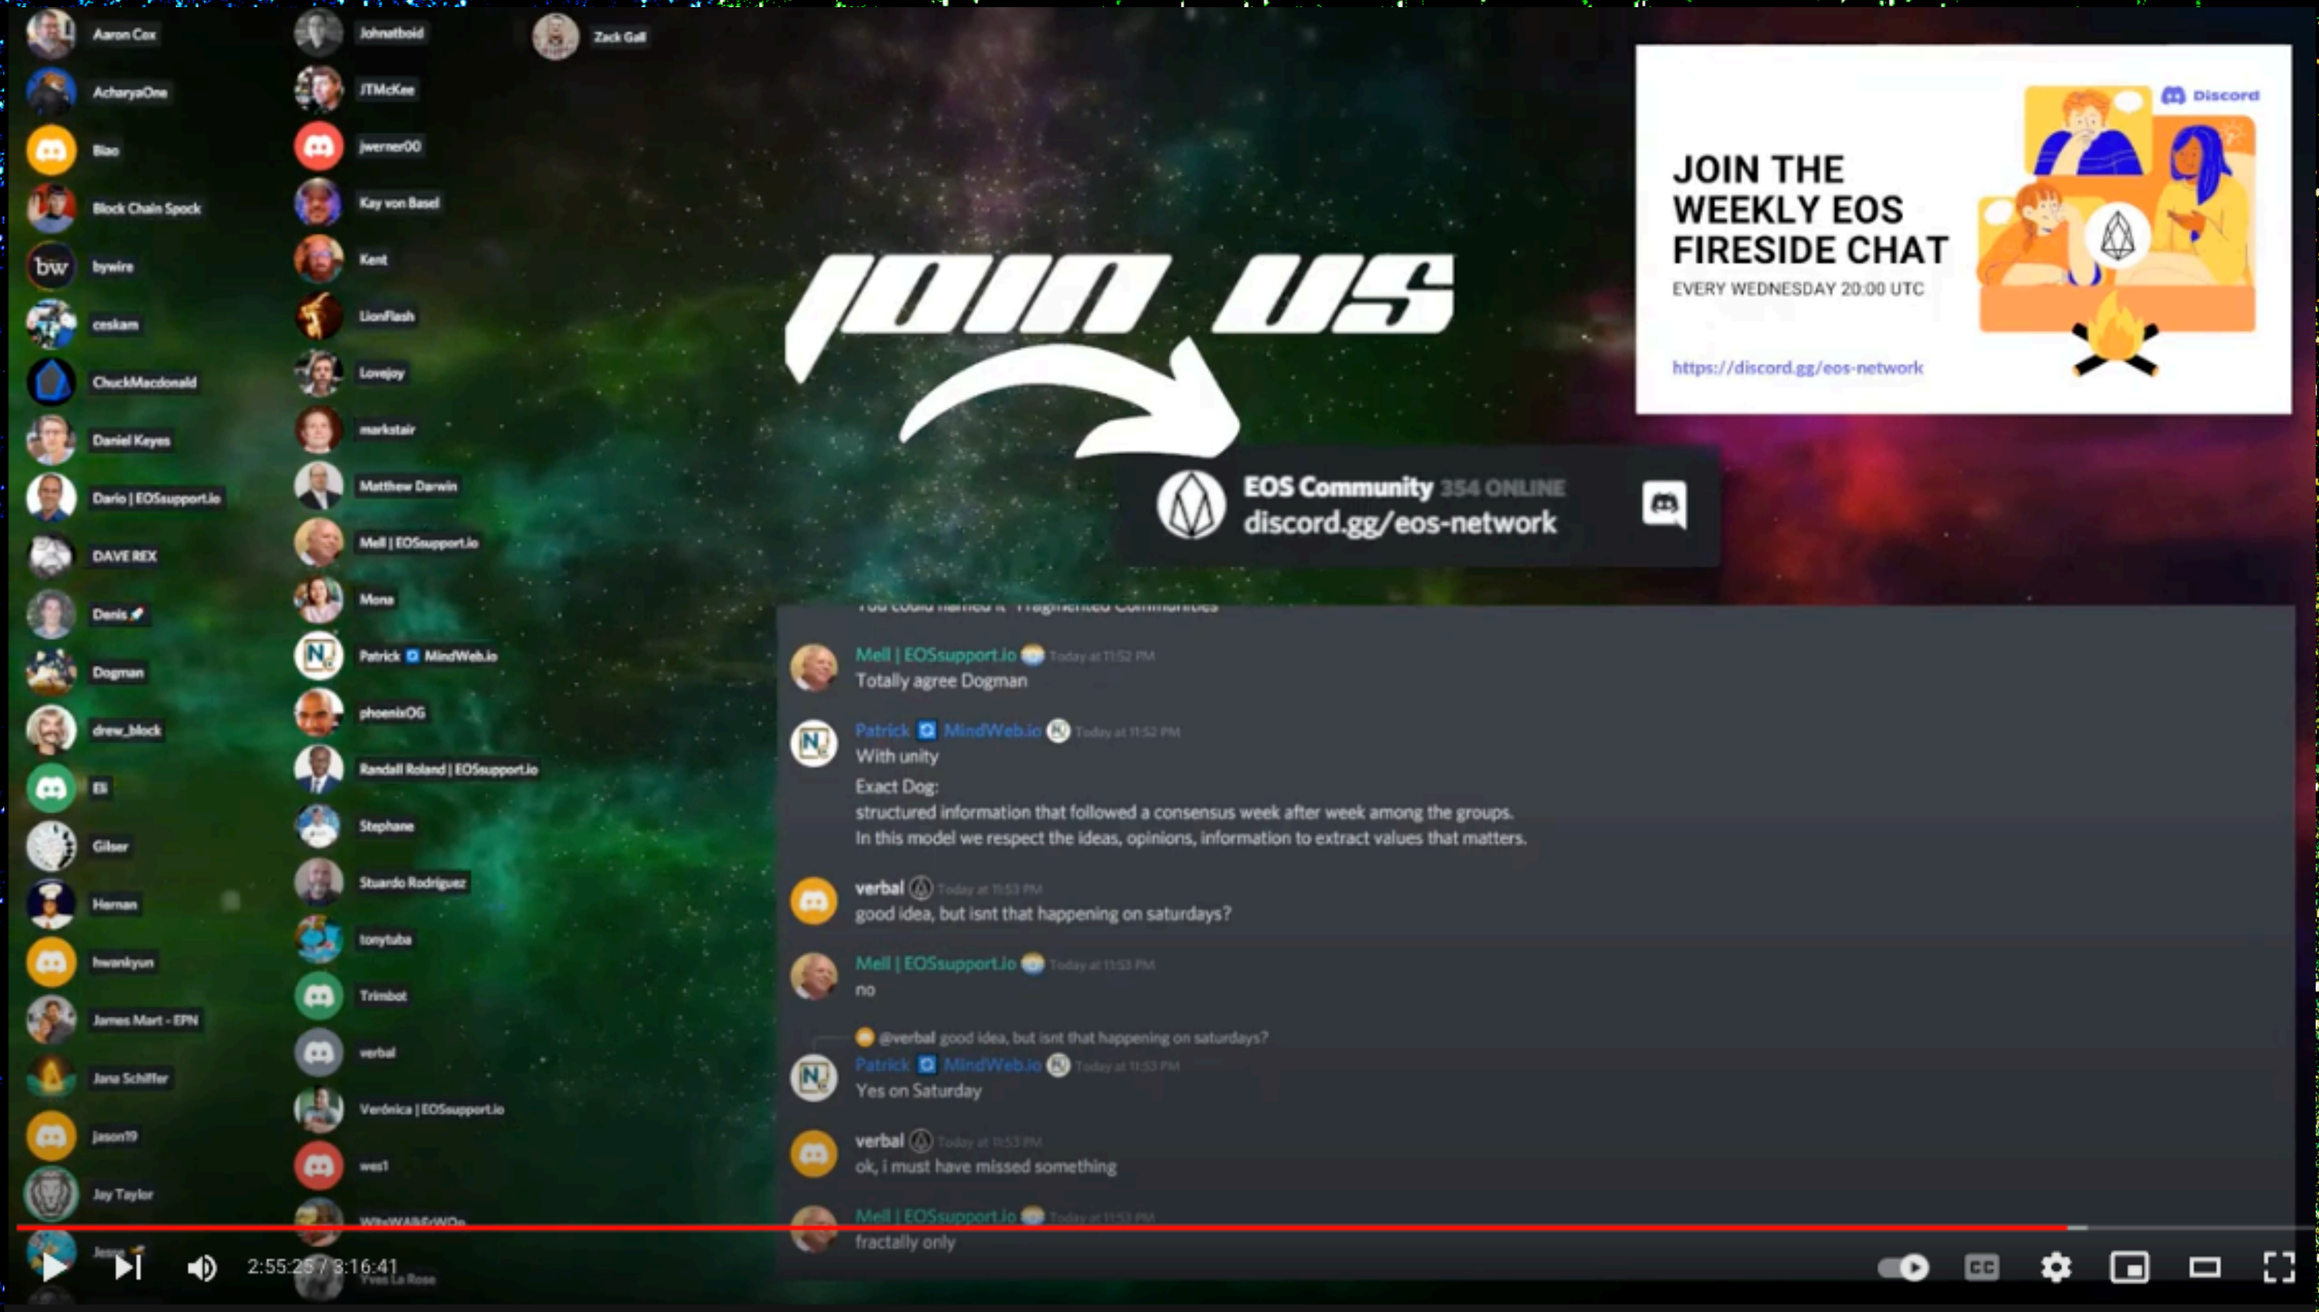

I generally disagree with this. I believe that fractally will grow very quickly and become super helpful when our community participates with enthusiasm. So far fractally has received some great and super exciting community support, but much of the EOS community has not yet realized the potential of fractally or participated with enthusiasm. (edited)

Sebastian | EOSsupport.io admin
Todays Call was so cool. Still going on.

Darkaudio123
A very positive, game planning discord chat. Great call.

EOS Fireside Chat 2

- *Spoke for about 10 minutes to help the EOS community understand the benefits of fractally*
- *Shared an informal proposal for a new EOS fractal to empower the EOS community with the meeting process of fractally*
  - *Timestamp: 2:52:20 - https://youtu.be/7gFBwirecBk?t=10340*
- *Started designing graphics for an EOS fractal and communicating with EOS community members who expressed interest in an EOS fractal*
- *Answered technical questions about fractally*
- *Shared an exciting 60 second draft elevator pitch for fractally*
- *Received many positive responses from EOS community*
- *Live audience in Discord averaged around 50 people, with many more viewers on Youtube, Facebook, and Twitter*
- *Great and super helpful conversation!*

Saturday is Fractally trial runs/experiments with a focus on Fractally.

ƒractally empowers communities with wonderfully helpful tools to cooperate, coordinate, and collaborate!

With ƒractally, everyone in the world can give their community superpowers to smoothly cooperate in harmony, coordinate all kinds of helpful work & fun meetings, and fairly reward everyone who does helpful work for the community.

ƒractally provides communities with a complete and fully featured cooperating system to empower communities to cooperate with the benefits of the digital age. By simply going to ƒractally.com and using a simple setup process in minutes, a community can easily set up there own blockchain empowered social media network, autonomous organizational structure, governance system, DeFi trading & investing tools, revolutionary system for fun meetings, community respect, and other state of the art tools with elegant & principled design to empower your community. All of this is possible without any programming experience, need to hire a team, special skills, or research about any kind of confusing technology. You can empower you community simply, like starting up a new subreddit or Facebook page, but with the alignment of Web3 to empower your community with the respect that your community deserves.

This is incredibly empowering for creators, artists, and community leaders of all kinds to accomplish any kind of goal. ƒractally provides all of us and humanity as a whole with an exponential upgrade to create all kinds of community and public goods in ways that were previously unimaginable!

The benefits for your communities and our civilization are profoundly exciting and can greatly empower us to make the best experiences possible!

*For example, I love music and am incredibly excited about how ƒractally will enable the creative renaissance of music and empower many millions of amazing musicians and music fans to enjoy and create music….

*Note: This is an early work in progress that I will improve in the future…

A few notes/disclaimers:

1. The elevator pitch should be tailored to each person or audience depending on their interests.

   For example, if someone is excited about water color painting then it's good to start a conversation about how ƒractally empowers water color painters and painting communities.

2. It will take time to refine and learn how to explain ƒractally in the most helpful ways possible.

   If the elevator pitches leave anyone people feeling like you still don't understand the benefits, then please be patient and continue learning with an open mind.

3. In addition to an elevator pitch, we also need great longer stories and videos to help inspire and help people understand the benefits of ƒractally.

   We're not actually giving this pitch in elevators but with our friends & family in our neighborhoods and our digital world, which both have a very different context from elevators and require different kinds of explanations. With digital media, we can make amazing audio visual experiences to convey the benefits of ƒractally. We can produce fun videos that look awesome and include many of the most inspired messages throughout our vast library of content. We can make many videos with thousands of hours of well-produced video, audio, written, and graphical content to help people diver deeper into ƒractally.

   All of these pieces of content work together along with the elevator pitch to help people understand the benefits of ƒractally. In many circumstances, the community needs these other kinds of content more than the elevator pitch.

ChuckMacdonald Yesterday at 5:02 PM

There is wisdom in crowds.

But the crowd's wisdom has always been conveyed by the loudest and most powerful people

There's a new tool now though that allows individuals to come together to talk about what matters to **them**.
By randomly sorting the crowd into small groups, *thousands* of conversations can happen, and when those small groups pick the best person to carry their message forward, the wisdom gets refined. When *those* people meet they're sorted again into small groups, and the message becomes even clearer. At the end of the process, the crowd's message has been distilled into something that everyone can get behind. They have elected the ideas that best represent their own.

This process is what fractally is building.

[Preamble: This is what I consider to be the essence of fractally: the political playoffs process. At the moment I consider the concepts - of work done, when it's been done, the person arguing, the team they represent, the greater group they are a member of etc - to be details that are linked with how, where and why fractally gets deployed.]

Eli Yesterday at 5:44 PM
There should probably be a "Fractally on EOS" group

verbal Yesterday at 5:09 PM
Much like how Bitcoin creates economic value in a decentralized way by incentivizing humans to use cryptography and electricity,
Fractally can create social (and economic) value in a decentralized way by incentivizing humans to connect and come to social consensus.

Join a fractal, rate contributions, and earn money by presenting your work to the community

Good feedback. Thanks.

The reason I wrote it as "feel" is because there is no objective measure for getting the respect you deserve. That measure is ultimately personal, and it is a feeling.

Dan Singjoy 1d
Moderator
This is an excellent and super helpful article! Thanks so much for writing and sharing this! 🙌

>What additional questions should I address?

I'm not sure, there are many other questions that can be helpful to address but this seems like a great starting point. One question that might be helpful to add soon is 'How do I join?"

Also some questions like 'How can I empower my community or interest with ƒractally?" might also be very helpful soon…

>What ideas do you have to better address these questions?

One piece of constructive criticism that occurred to me while reading was about this sentence: "Everyone should feel like their voice counts and like their contributions get the respect they deserve"

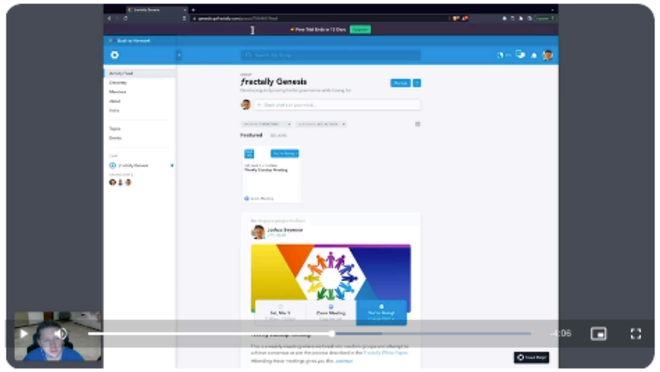

I agree that everyone should feel like their contributions get the respect they deserve, but it might be best to focus more specifically on 'getting' the respect they deserve rather than just feeling that way. I might also change the intended audience in this sentence to be more personal and directed towards the reader.

For example "Your voice counts and you should get the respect you deserve."

This might be kind of nitpicking and I like how you wrote it too. It's important that people feel that way and actually get the respect they deserve, and it's also important for everyone as well as the individual reader. Just an idea that I figured might be helpful to share since you asked.

Thanks again so much!

Fractally Feedback

My post-mortem of today's fractally consensus meeting (my first):

I liked that my group had a mix of new people (like me and one other person) and seasoned Eden and EOS veterans.

Everyone in my group was pleasant and professional.

One member couldn't participate due to an English language barrier.

I learned that not everyone is using genesis.gofractally.com for communication and coordination, and that Telegram is also widely used (I had to join the "Genesis fractally Group" in the middle of the meeting to fully participate with my group).

I learned that I need a Hive account to either join or create a team.

Still unclear to me is how to find a compatible team. There is no "fractally recruiting service" to connect "hiring managers" and candidates that I am aware of. Maybe Hive will help me with this.

Posted Sat, March 5

R. Bretminster Fullofit
When it comes to the council of 12 and 'respect earned' having a role— is that respect 'earned' only that which was earned in the system... or does that mean 'respect' you have which could have been purchased?

In other words, when 'respect earned' has an influence— does that include respect 'earned' by purchase?

Dogman edited

>when 'respect earned' has an influence— does that include respect 'earned' by purchase?

No. Respect does not have influence or voting power when purchased, only when earned via community votes.

Dogman admin
> Taner Seyt
> bc there will be edge cases where you have groups of 2,3 or 4 if grou...

I don't think there are any edge cases where groups will be smaller than 5 unless people check in but fail to show up in the meeting.

Here is the section in the whitepaper about this:

While we are designing based upon theoretically equal groups, the reality is that not all groups can have exactly 6 members (pigeon hole principle[9]). This means that in any given round up to 5 groups may only have 5 members depending upon how many check-in. It is possible for more than 5 groups to have 5 members and some groups to have less than 5 if some people check in but fail to show up in the meeting. When factoring in no-shows and remainders, the target group size needs to consider the consequences of two group sizes at the same time. So the options are 4-5, 5-6, 6-7, 7-8, or 8-9. Of these options, having some groups of 5 is better than having some groups of 4. With a group of 4, 3 of 4 must reach consensus (75%) and 2 of 4 (50%) can block consensus. If all groups could be groups of 4 then it would be a stronger consensus and easier dialog than if all groups could be groups of 6; however, in this case, some groups would end up being 3.

After much consideration, a target group size of 6 with some groups of 5 was found to be the best compromise. The rule for consensus within each group is either 4 of 6 or 3 of 5. This means that it always takes at least 50% of the group to abort a consensus and at least 60% of a group to reach a consensus, with the vast majority of the time requiring 67% for consensus.

Dogman
> Luka Perrrcic
> every project can work if it gets 2% inflation in

It's not about 'can work.' With 2% inflation fractally could help create tremendous benefits for EOS

Dogman admin
> Taner Seyt
> how would we handle fractals of size 7, 8, 9, 13, etc...

What do you mean?

Dogman admin edited
> Taner Seyt
> its not always possible to split up evenly into groups of 5 and 6

The large majority of fractal meetings will have 6 participants. Relatively few will have 5 participants. The groups will only have less than 5 participants in very rare edge cases where a participant needs to leave immediately before the event starts.

Fibonacci > Pareto

Dogman
> Luka Perrrcic
> i know they do, they also repeat frequently in anything random

The shapes of waves, galaxies, DNA, trees, flowers, and shells are not random though.

They all follow the Fibonacci sequence, as do so many other occurrences in nature 🐚

Luka Perrrcic admin
> Dogman
> The shapes of waves, galaxies, DNA, trees, flowers, and shells are not random th...

no they are not, not every spiral is a fibonacci sequence

Dogman
> Luka Perrrcic
> no they are not, not every spiral is a fibonacci sequence

Not every spiral, I could draw a spiral that doesn't have the Fibonacci sequence.

But as far as I understand, many or most:

DNA 🧬
Hurricanes 🌀
Flowers 🌺
Trees 🌲
Shells 🐚
Galaxies 🌌

And more do have the same Fibonacci ratios...

Dogman
> Mo Z. D.S.

>How do you know not to respect THAT Fractal, if there are 100s or 1000s, how do you know people will do the research into others Fractals vs just agree to fund anyone asking to form a bond?

It's up to each participant in the free market. Each ƒractal can decide if they want to devote resources to form Mutual Respect with other ƒractals.

Mutual Respect comes with a cost, so ƒractals should be smart about choosing helpful partners and forming Mutual Respect to benefit their community. If a ƒractal makes bad decisions and gives away community resources without doing research, then people will be less likely to Respect that ƒractal.

Dogman
> Mo Z. D.S.
> How do you know not to respect THAT Fractal, if there are 100s or 1000s, how do you know people will do the resea...

>How do you know 24 people won't create 2 Fractals and form a LP amongst themselves.

They can, but would need 72 people though.

What will fractally be in 5 years, most likely?

fractally is built with sybil resistance and subjective system to allocate rewards to helpful contributors

---

Dogman

> **Mo Z. D.S.**
> How do you know not to respect THAT Fractal, if there are 100s or 1000s, how do you know people will do the resea...

>Is Fractally going to be in the business of deciding what Fractals are worthwhile and which aren't?

The prime ƒractal and all other ƒractals can decide which ƒractals are worthwhile for devoting resources towards Mutual Respect.

For example, the prime ƒractal can decide whether to devote resources to Mutual Respect with a cake making ƒractal, depending on how much they respect the work for the cake making ƒractal.

Dogman

> **Marcin**
> Can you explain in short how fractally helps with development? My take is the funds (6% inflation) goes

Hi Marcin,

Thank you for asking!

>Can you explain in short how fractally helps with development?

Yes, fractally empowers EOS to incentivize and pay developers who help EOS.

If you develop a new feature that your community respects and your community is respected by EOS, then you will be rewarded for your work with Respect.

fractally empowers communities with a credibly neutral, highly effective, and wonderfully fun process to subjectively allocate value to developers who help their community.

This can be profoundly helpful for EOS development! 🌱

> Lol. I wasn't paid but I did earn.

Lol, there's a subtle and important distinction here.

There's a huge difference between being paid 'to' do something and being retroactively rewarded for helpful work that you do on your own volition.

See the following videos about retroactive public goods funding for more about this:

i like the fact that it promotes and fund subject valued community ideas (is this true that is ideas? or its work done) and projects... Does it use consensus to do this? Is that how the subjective value of a project, or work is determined?

Dogman admin edited

> Randall Roland
> i like the fact that it promotes and fund subject valued commu...

I think that fractally is designed moreso to subjectivelly allocate value towards work done, but the process can also be super helpful for ideas!

fractally can empower ideation in similar ways to the fractal forums that @ChuckMacDonald and I have been talking about...

https://twitter.com/IgnoreRonPaul/status/1493066080142741506

Chuck MacDonald @IgnoreRonPaul · Feb 13

Way to go, @DogmanLabs! Hit me up with anything at all. If I can help I will!

The Eden process - with its existing code - can do so much more than elect people and give them budgets. It can sharpen and then hone ideas, and it can give expression to a group's unspoken motivations.
