1. Family Cupressaceae, most likely an Incense Cedar (Calocedrus decurrens)
2. Coast Redwood (Sequoia sempervirens)
3. Monterey Cypress (Cupressus macrocarpa)
4. I actually have no idea, I'll accept any species that has catkins
5. Family Fagaceae, genus Quercus, probably a White Oak (Quercus alba)
6. Probably a Juniper or a Pine, I'll take either
7. Family Pinaceae, genus Abies, most likely Red Fir (Abies magnifica)
8. Family Cupressaceae, maybe a Western Red Cedar (Thuja plicata) or Incense Cedar (Calocedrus decurrens)
9. Family Pinaceae, probably a spruce, other than that it isn't very clear
10. Family Pinaceae, Subfamily Pinus, maybe Lodgepole pine (Pinus contorta)
11. Family Pinaceae, Subfamily Pinus, probably a very lucky Whitebark Pine (Pinus albicaulis) that wasn't battered by the elements
12. Family Pinaceae, Subfamily Pinus, probably Lodgepole pine (Pinus contorta)
13. Idk but I think it was a Sycamore, I'll accept anything
14. Family Fagaceae, genus Quercus, most likely Coast Live Oak (Quercus agrifolia)
15. I think it was a Maple but I'll accept anything with 5 lobed leaves
16. Southern Magnolia (Magnolia grandiflora)
17. California Fan Palm (Washingtonia filifera)
18. California Sycamore (Platanus racemosa), but I'll take anything similar
19. Family Rosaceae, genus Rhaphiolepis, this is a bush on my uncle's front lawn and the genus is not on the tree list so I'll accept anything in Rosaceae that looks somewhat similar
20. Family Salicaceae, genus Salix, probably a Black Willow (Salix nigra)
21. Family Bignoniaceae, it's a Golden Trumpet Tree (Tabebuia chrysotricha) and the genus is not on the tree list, so I'll accept any Bignonia
22. Family Pinaceae, genus Pinus
23. Cabbage Palmetto (Sabal palmetto)
24. Bamboo!
