Quanted

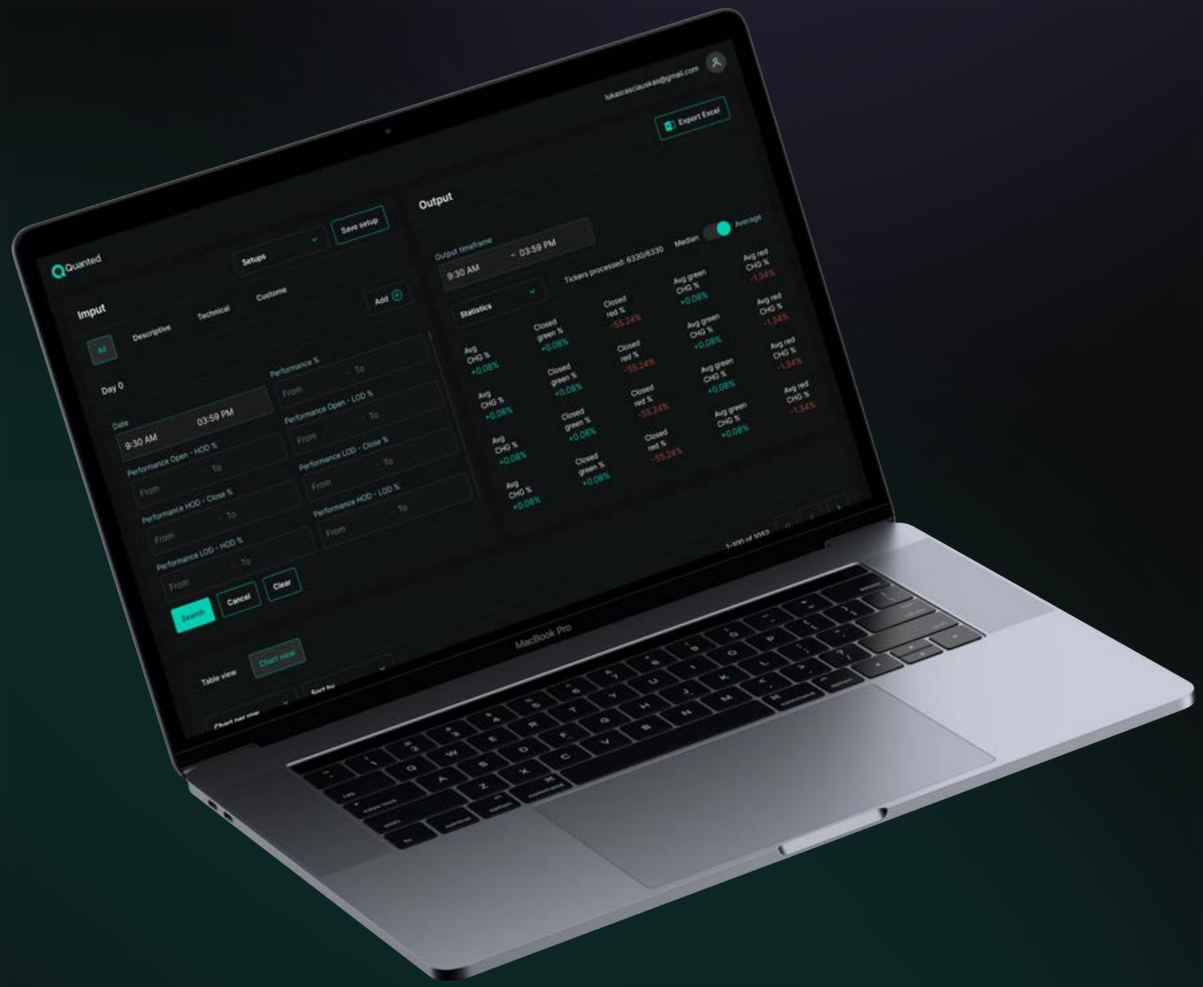

Helping traders **turn stock market data** into actionable **trading ideas.**

What is Quanted?

Quanted is a stock market data research software for traders.

We greatly reduce the time, money, and resources needed to research the markets, develop trading strategies, and get alerted when they happen in real-time.

95%

Of traders lose money

The **main reason** why they fail is a **lack of trading edge**. Having a trading edge means having a **strategy with a positive expectancy**.

“An inability to follow your trading rules is NOT the reason most traders fail. A lack of trading edge, the ability to identify it in real-time, and execute it properly is. “

- Mike Bellafiore, Founder @ SMB Capital (Trading firm in NYC)

Problems

Researching the markets and building strategies is super slow and inefficient process:

01

Traders have to collect market data samples manually (which takes multiple months) or buy raw data.

02

Traders need advanced Excel or coding skills to organize and analyze collected data.

03

Traders currently juggle 3+ different tools for data collection, analysis, and scanning for strategies in real-time. This is extremely inconvenient and expensive.

01

Access a huge research-ready data instantly.

02

Use no-code filters and natural language for data research and analysis. No need for countless excel sheets and coding skills.

03

Research data, build trading strategies, and be alerted in real time when market conditions align. All in one place.

Solutions

Quanted is an all-in-one software, that allows traders to:

Quanted today

Backtesting

6 years of historical data

Backtest a few strategies

Get statistics of your trading strategies in seconds

Save your best strategies in our system

AI Research

Real time scanner

Quanted tomorrow

Backtesting

13 years of historical data

Backtest any possible strategy

Get statistics of your trading strategies in seconds

Save your best strategies in our system

Python terminal for advanced data analysis

AI Research

Use natural language for data research

Quanted AI Copilot

Visual pattern recognition

Real time scanner

Visual pattern recognition and real time alerts

Get alerted for your strategies real-time

Why Us?

We are experienced traders and developers. We deeply understand the problems traders face and have high technical competence to solve them with Quanted.

Paulius Znaidauskas

Co-CEO

Experience:

Equities trader 4+ years,
Previously Analyst @ Swedbank (created trading systems for derivatives and FX),
Co -founder @ Baltic Arrow

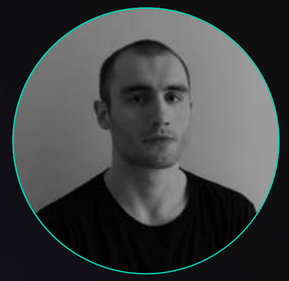

Andrius Znaidauskas

Co-CEO

Experience:

Equities trader 4+ years
Ceo at Nuova
Co-CEO, Co-founder at Baltic Arrow

Andrius Elsbergas

CTO

Experience:

10+ years backend coding
Senior software engineer at Kayak
Back end developer at Gooqx
Java developer at Telesoftas
Software engineer at Nortal

Market Size

We focus on active traders. It is estimated that **9%** of retail market participants are active traders.

115M

Total accounts in main US brokerages

10,3M

9% of all market participants are day traders.

12,3B $

TAM

Traction

$2300

Reccuring Users

$26000

$ generated to date

We also have customers from professional trading firm in US - Seven Points Capital

Some love from our users

@laserwolf33

"Two of my closest trading buddies, and I were putting together a new setup earlier using. The speed and ease which you can pull stats and charts is absolutely incredible. Built by traders for traders. We were all just laughing like kids at how easy you can build and test new setups. I can not recommend this software enough."

@ValentinTrades

""Hands down one of the best tools I've used"

@jjfade23

"I can't believe I didn't listen to you sooner now that I actually mess with it I f*****g love it nothing better for small cap back testing and going through charts"

Business model

We charge our users monthly or yearly fee to use the software

79$ / month

We charge a monthly subscription fee which is 79$ now.

799$ / year

We also have yearly plan for 799$

119$ / month

Updated Quanted version with more data will cost 119$ a month

Roadmap

2022
Initial idea

2023 02
First launch

2024 04
2300$ MRR
33 reccurring users
26000$ total sales

2024 04
Raise 320k Pre-seed
(our goal)

2024 05
Start working full-time on Quanted
Hire 2 additional developers
Add 6 new data sources
Add 13 years of data and increase pricing to 99$/month

2024 06
Add real-time data
Start building real-time scanner
10k MRR

2024 08-09
AI Copilot
Historical and real-time pattern recognition
30k MRR

2025 01
100K MRR

The Ask

We are seeking 320k (eu) investment that will allow us to:

01

Go full time, hire 2 additional developers, cover 12 month costs.

02

Reach our roadmap goals and build the tomorrow version of Quanted

03

Achieve 1000 paying customers by 2025.

Thank you
