NOTGELD COLLECTORS GUIDE is the title of a new aid to the collector of German notgeld. It is designed primarily to make the new "Serienscheine" catalog more useful to the English-speaking user. Included in the guide is an outline of the catalog, translations of abbreviations used in the listings, descriptions of watermark types, a section of translations of words found on or associated with notgeld and a chart showing how to read the sometimes confusing German lettering style. The guide is free to those who buy catalogs from me or who order something else when requesting a copy. Otherwise, send 50¢ to help with production cost and postage.

REUTERGELD CHECK LIST. A new check list of this series is now available to help collectors keep a record of their Reutergeld notes. Several collectors are attempting to complete this 210 note series. This check list is free with any order, otherwise send a stamped self-addressed envelope.

NOTGELD COLLECTORS now have available more catalogs, books and check lists to make their hobby more interesting and challenging than ever before. The biggest boost to the hobby has been the publication of the 295 page catalog "Kleingeldscheine 1916-22, Part 4, Serienscheine" which lists the colorful notgeld issued mostly in 1921-22 in sets or series. Although there are several other classifications of notgeld (cataloged in other volumes), this book covers most of the notes in the average collection.

SPORTS THEME CHECK LIST in preparation. Collectors who specialize in certain themes or topics on notgeld will be glad to know that a check list of "Sports on Notgeld" is being compiled. Inquire if interested in this list.

COLLECTING BY SETS is gaining in popularity. Now that a catalog is available to everybody, collectors can find out what notes belong in the various sets and seek to complete them. Notes tend to become more valuable when part of a complete set. Why not try completing some sets of your choice?

THIS NEWSLETTER will be sent to almost every person on my extensive mailing list of notgeld collectors. This list includes the enthusiastic collectors, the casually interested and no doubt many who were just curious and sent for some free information. With increased costs of paper, printing and postage, I must ELIMINATE several hundred names from my lists. If you are still interested in notgeld in any way and want to remain on my mailing list, it necessary that you RESPOND TO THIS MAILING. Otherwise I will assume that you are no longer interested and dispose of your name.

WHY NOT GET ACTIVE in this fascinating hobby? Select some area, town, topic or sets that appeal to you and start looking. If you wish to buy or sell, please contact me.

A NEW BOOK has been published in Germany which lists every "place" that has issued notgeld. Some collectors may want to try to obtain one example from as many places as possible. I do not have these books in stock yet.

REUTERGELD FOR SALE. I will attempt to fill want lists for Reutergeld at the rate of 35¢ each piece. I have all 210 varieties in stock at this time. I plan to issue a special price list of other SETS soon. If you want to receive this special list of sets I must hear from you.

If you collect paper money of the world, please send for my current price lists. I have many new items in stock at very reasonable prices.
